About Us

Welcome to Red kitchens

We're a family business based in Harare, Zimbabwe, with over 12 years experience in kitchen design and cabinet making. Our passion is design, craft and character. The kitchens and furniture we craft will become a well loved feature in your home, lasting a lifetime. We offer a two year warranty but the cabinets last for several years, at least 15yrs. Our modern units either painted, made of natural wood or made from Melamine. Painted finishes are very popular and available in any colour. Natural finishes show wood with lots of character, each piece has interesting grain.

We are proud of our ability to design a kitchen with you that will be the heart of your home. We take time to understand your needs and, with a watchful eye on your budget, design your kitchen including bespoke pieces that make your kitchen uniquely

Yours.

DESIGNING YOUR PERFECT KITCHEN

Following our expert Kitchen Designer's first meeting with you at your home we will start with a blank piece of paper at the drawing board and map out your kitchen the traditional way. This plan will then be used to generate a virtual kitchen design based on your discussions with us.

Using our Computer Aided Design (CAD) package we are able to put together a design sheet featuring detailed floor plans, 3D views, birds eye views and photo realistic pictures to help you visualise the final look of your kitchen... Allowing you to see your kitchen before it is even built.

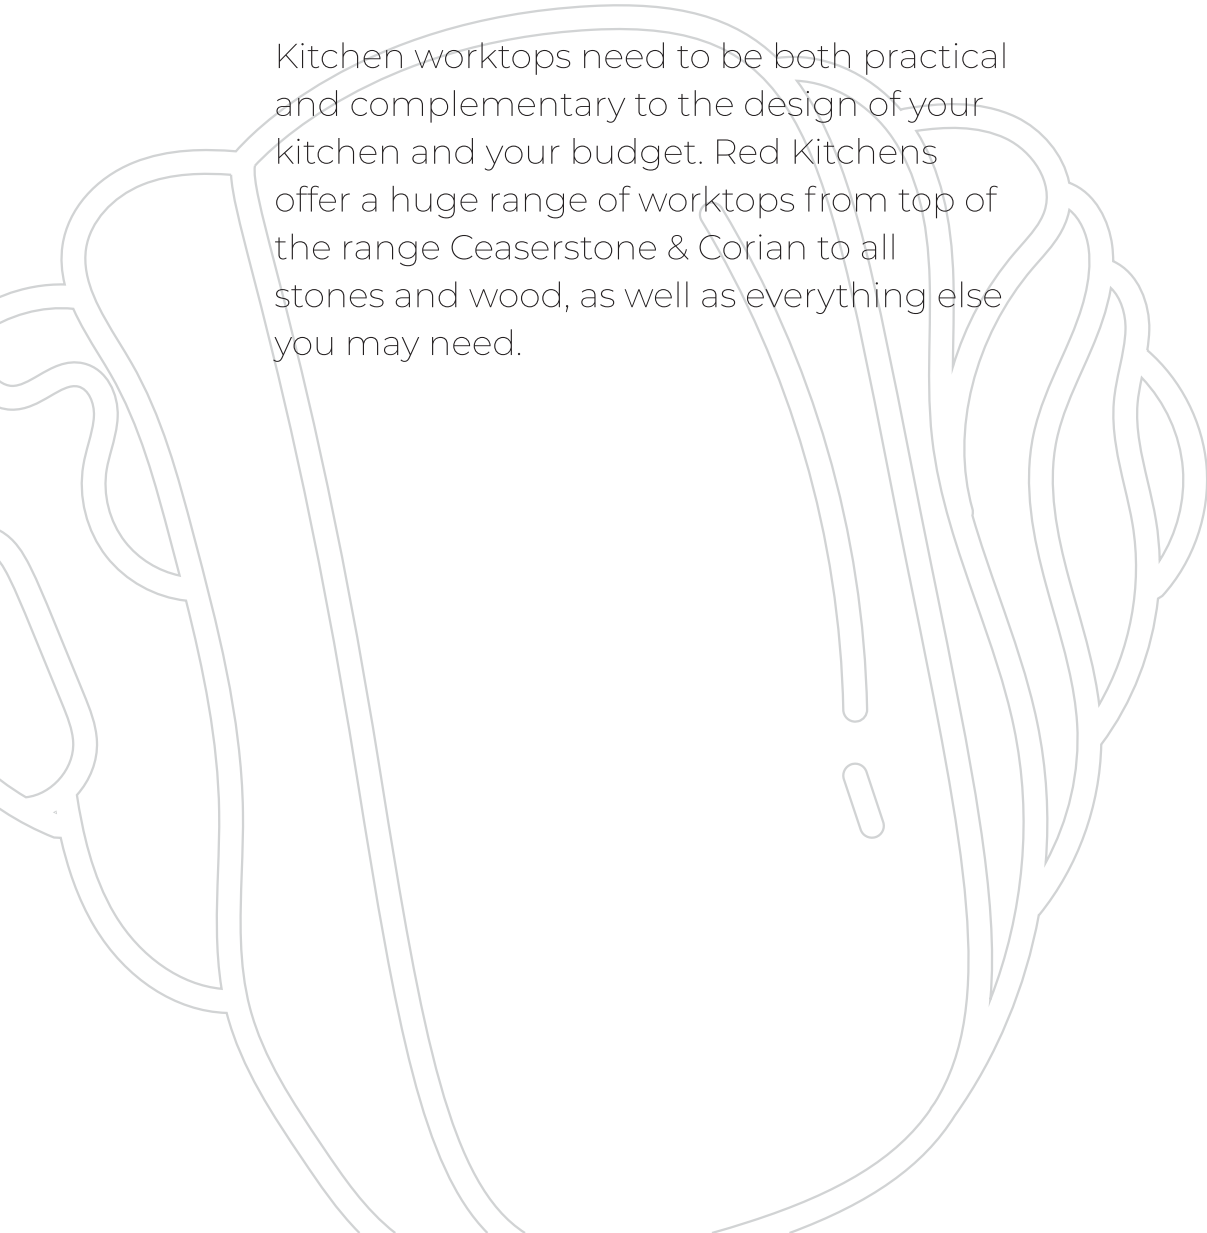

This information is presented to you at our second meeting. We explain the design and go through the plan, the CADs and the costs with you. Our initial meeting has often prompted further thoughts on your part so together we have a thorough discussion and amend the design to ensure your new kitchen is all you hope for.

Worktops

DESIGN AND INNOVATION

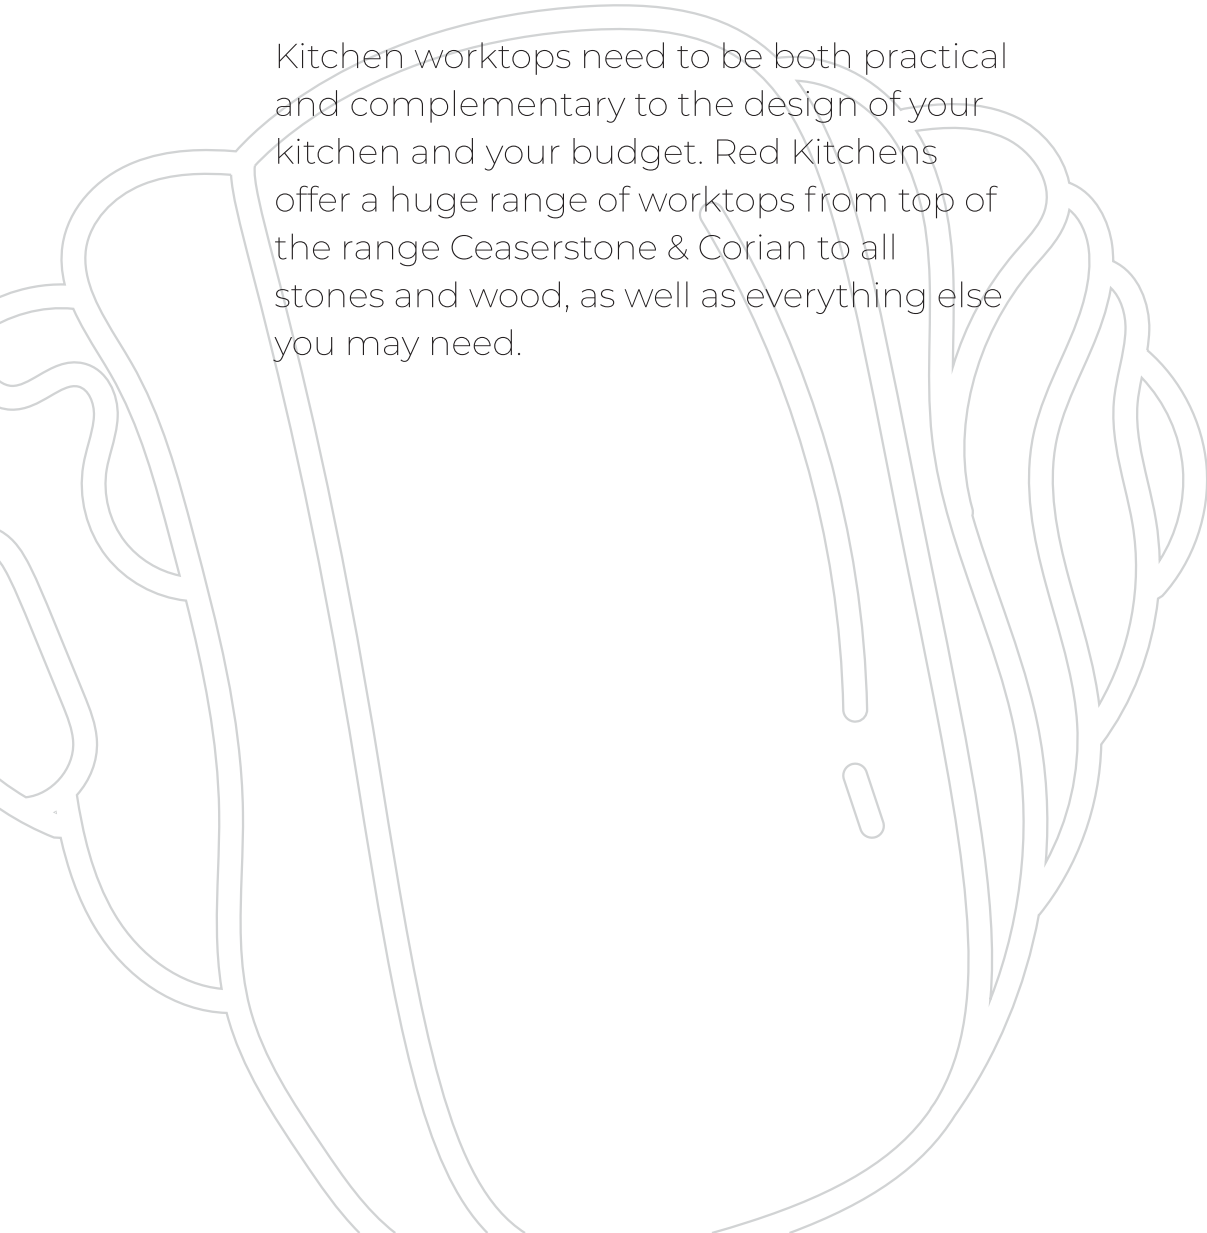

Kitchen worktops need to be both practical and complementary to the design of your kitchen and your budget. Red Kitchens offer a huge range of worktops from top of the range Ceaserstone & Corian to all stones and wood, as well as everything else you may need.
